

ANDRE OLEARI

Mobile Engineer: React Native, Expo, Firebase, Native iOS

Cork, Ireland · andre.oleari1@gmail.com · +353 83 390 0174 · andreoleari.com.br/en · github.com/AndreOleari015 · linkedin.com/in/andre-oleari-83406520b

PROFILE

Software Engineer with experience in delivering cross-platform mobile applications using React Native, Expo, and TypeScript. Possesses expertise in designing reusable architectures, building CI/CD pipelines, and developing serverless backends. Has led the development of numerous applications from concept to store release, including independent projects with native iOS layers.

SELECTED PROJECTS

Bus Times: Dublin & Ireland · Live public transport app for Ireland, published June 2026.

- Built the serverless backend behind it: a Node pipeline that turns the 411 MB national GTFS feed into 10,200 per-stop JSON documents in Cloudflare R2, served by a Worker that polls the GTFS-Realtime feed on a cron and holds LRU caches, a kill switch and a per-IP rate limit. No database, and zero errors across 62,400 Worker invocations in a 30-day window. Published as open source under MIT.
- Wrote the native layer by hand: a SwiftUI Apple Watch app that mirrors data over WatchConnectivity rather than calling the backend again, and WidgetKit widgets that stay correct while the app is closed by pushing a timeline iOS walks on its own.

Lista Virtual · Event guest-list, RSVP and live check-in platform.

- Built an offline-first event check-in platform used across 4,376 events and 39,971 guests since January 2025, 13,406 of them checked in at the door, with WhatsApp/email invitations, spreadsheet import, PDF/Excel reporting, multi-user receptionist access and 11 languages.

EXPERIENCE

Software Engineer · Pixel Logic Apps

Nov 2024 to Jul 2026

Remote

- Designed reusable component architecture and Firebase/REST integrations with real-time data synchronisation.
- Built CI/CD pipelines with GitHub Actions and Expo EAS, and implemented RevenueCat subscription flows and Cloudflare Workers edge services.
- Lead developer on over a dozen of the studio's catalogue apps, owning them from first commit through to store release.
- Contributed to 30+ cross-platform applications from concept to App Store and Google Play publication using React Native, Expo and TypeScript.
- Authored internal tooling, including a shared expo-utils library and Fastlane release pipelines, reducing the store release process from a full working day to a few hours.

SKILLS

Languages TypeScript, JavaScript

Mobile React Native, Expo, Expo Router, EAS Build, Fastlane, Swift, SwiftUI, WidgetKit, Realm

Backend Node.js, Firebase, Firestore, REST APIs, Cloudflare Workers

Delivery App Store, Google Play, GitHub Actions, Offline-first architecture

EDUCATION

Technologist in Systems

Mar 2022 to Dec 2024

Analysis and Development

Instituto Federal do Pará (IFPA)

NARIC Ireland comparability statement obtained.
